Professional Experience

Software Engineer Full Stack at CLEO AG

July 2024—Present

- Leading a team of 3 developers to build innovative internal tools that optimize and streamline processes.
- Collaborating on large-scale external projects for major commercial clients, leveraging Agile and SAFe methodologies in a 120-engineer team.

Frontend Software Engineer at easylearn schweiz ag

July 2022—June 2024

- Enhanced the 'easylearn' LMS platform by extending the internal component library, completing 100+ merge requests within 6 months.
- Spearheaded the implementation of Storybook for frontend documentation and Jam.dev for error logging, significantly improving team efficiency.
- Promoted to 'Professional' within a year for outstanding contributions in an 8-member agile team.

Solution Engineer at Docucom ELCA

February 2020—May 2022

- Engineered tailored solutions for banking and insurance clients, collaborating on data model construction.
- Conducted manual testing of solutions using Docker and Azure Cloud to ensure robust performance and scalability.

Full Stack Software Engineer at Self-employed

September 2019—February 2020

I have been freelancing for the past 5 years. I have worked on a broad variety of projects, spanning across different industries and technologies.

- Delivered diverse client projects as a freelance full-stack developer, including custom CMS, e-commerce platforms, full-stack applications, and React Native mobile solutions.
- Successfully executed numerous WordPress and Webflow projects, meeting varied industry demands and technical specifications.
